- Standard Trailer dual pack pumps 160 gpm aloft (2 evaporators)
- 25% evaporation rate would yield 1.728 million gallons per month evaporated
- 50% evaporation rate would yield 3.456 million gallons per month evaporated
- Self contained unit with one 30hp 4 stage vertical SS centrifugal pump
- Wheels make it easy to reposition around the pond as conditions change
- Optional pond intake available with up to 100 feet of 3" intake hose.
- Monthly maintenance allows 24/7 operation rain or shine
- Corrosive waste not a problem for any Turbomist model
- Standard system includes self-cleaning filter system

## **SINGLE TRAILER MODEL EVAPORATOR**

*Turbo-mist*

**Self contained unit with pump and self-filtering system**

*Turbo-mist*

**Can be towed around job site**

*Turbo-mist*

**Has built in control panel with low pressure shut down**

*Turbo-mist*

**One person to adjust to wind conditions can turn wind tunnel**

*Turbo-mist*

**Standard unit pumps 80 gpm aloft**

*Turbo-mist*

**25% evaporation rate would yield 864,000 gallons per month evaporated**

*Turbo-mist*

**50% evaporation rate would yield 1.728 million gallons per month evaporated**

*Turbo-mist*

**Can add a second unit and utilize one pump for both**

*Turbo-mist*

**Monthly maintenance allows 24/7 operation rain or shine**

*Turbo-mist*

**Units are powder coated to allow use in highly corrosive waste situations**
