

TRAILER MODEL VERSION:

STANDARD FEATURES INCLUDE ALL LISTED ON THE BASIC MODEL

Plus:

1. Trailer frame replacing basic frame, with 7.60L x 15SL tires, Hammerblow 2 5/16 ball hitch finished in scotchkote 134 powder coat by 3M Corp
2. Pentair 20 horsepower 8-stage stainless steel centrifugal pump with its own switchgear and control panel including auto shutdown due to low pressure.
3. Stainless steel intake system with swivel and 2 ten-foot sections of stainless steel 3 inch pipe equipped with quick connectors for ease of set up.
4. Self-cleaning filter system with quick connects to mount on the end of the supplied intake system.

Note: The pump on the trailer or float model is capable of feeding two evaporators, therefore if two units are required, the second unit can be ordered with the pump at a reduced price.

OPTIONS AVAILABLE ON THE TRAILER MODEL:

1. Stainless steel flow meter system
2. Voltage of motors as required
3. Nozzle choice (Teflon standard)
4. Choice of deducting the pump & switch gear starter control panel and intake system on a second unit , this is a dual pack
5. One additional 10 ft stainless steel intake pipe.
